Chewing
Nibbling
& Biting

with

NibbleNot™

Concentrated, Protective,
Healing Ointment

NibbleNot simultaneously deters animal chewing, nibbling and/or biting, and promotes healing when applied to cuts, bruises, rashes, abrasion, or medicated, sutured and /or bandaged areas.

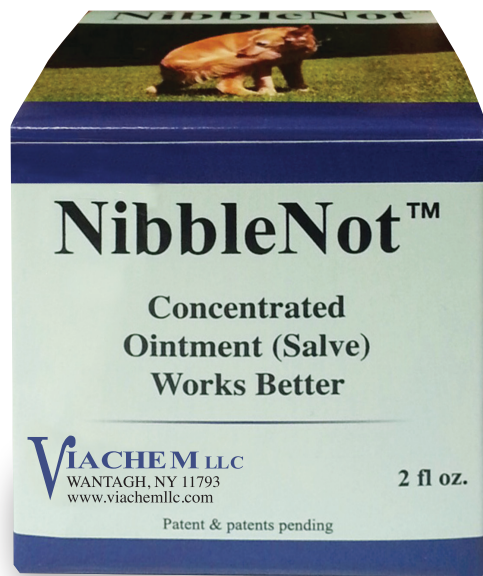

- **NibbleNot** is effective in curtailing tail chasing and biting behaviors.
- **NibbleNot** is for use with dogs, cats, horses, rabbits, sheep, goats, cattle, and most other domestic animals and pets.
- **NibbleNot** contains special vile, bitter, and pungent tasting, aversive agents which prevent animals from nibbling on or licking treated areas and destroying wound dressings or bandages, or from chewing on their coats.
- **NibbleNot** also contains special healing agents that can foster or accelerate healing of surface wounds.

NO More Chewing, Nibbling, Tail Chasing or Biting

with

NibbleNot™

Concentrated, Protective,
Healing Ointment

NibbleNot is far more cost effective and longer-lasting than weaker, aqueous based products.

NibbleNot has an extremely awful taste, and steps should be taken to avoid getting it on hands and fingers. Apply it with an applicator, such as a cotton swab or cotton pad, and/or use rubber gloves. Wash hands with soap and water after use, especially before eating.

NibbleNot is for topical use only. Apply a thick coat of **NibbleNot** over the entire area to be treated, up to three time per day for no more than 10 days. Do not use on or near eyes, nose, mouth, teats, udders, genitalia or festering wounds. Discontinue use if area is infected or shows no sign of improvement, and consult a veterinarian.

Exempt from EPA registration - 40 CFR 152.10 (Not intended for use as a repellent)

No medical or veterinary claims are made for this product.

Disclaimer: No actual claims are made for preventing, mitigating, treating or curing animal wounds or related conditions.
