

# YUCK!™

## Extraordinary Biting and Sucking Deterrent

**YUCK!™** is an effective, unique, nail-biting and thumb-sucking deterrent. **YUCK!™** contains safe, yet vile, pungent, bitter-tasting substances that make treated fingers so distasteful that users quickly become conditioned to avoid placing their nails or fingers in, or even close to, their mouths.

- YUCK!™**
- Helps stop children from sucking their thumbs.
  - Helps stop children, teenagers and adults from biting their nails.
  - Is safe and non-toxic when used as directed.
  - Is colorless and odorless after application.
  - Avoids the need for costly artificial nails.
  - Tastes Yucky!

**YUCK!** is so extremely bitter and distasteful that users are discouraged from sucking, biting, chewing, licking, or even putting their fingers, or other treated areas, into their mouths. One of its patented ingredients is used as an additive in toxic household products to help prevent accidental ingestion and poisoning of children and pets. **YUCK!™** is safe for use by adults, teenagers and children when used as directed.

### Directions for use:

Apply daily, as needed. To keep fingers out of mouth, paint on fingernails, under the tips of nails, and on the surrounding skin. Allow **YUCK!™** to dry thoroughly.

**YUCK!** can be easily removed with nail polish remover, followed by soap and water.

Remove **YUCK!** before touching food, then reapply.

**Ingredients:** Lacquer, Benzyl diethyl (2,6-xylyl-carbamoyl) ammonium saccharide, 2-(Diethylamino)-N-(2,6 dimethylphenyl) acetamide capsaicin.

**YUCK!** can be easily removed with soap and water.

**Net Content:** 13 ml. (0.45 fl. oz.)
