

PLAQUE-OUT™

Helps Fight Amyloid Plaque & Tangles

PLAQUE-OUT™ is a natural, advanced dietary supplement that helps in the fight against amyloid plaque & tangles, which can trigger inflammation in the brain's nerve cells and resultant SCD (subjective cognitive decline).

PLAQUE-OUT is an especially effective combination of integrated ingredients which can work together synergistically to help delay or possibly prevent the progress of Alzheimer's Disease and other forms of memory loss and dementia.

There are numerous possible reasons why amyloid plaque and tangles (sometimes called beta-amyloid or tau) might appear in the brain; and contrary to what some believe, accumulation of amyloid plaque is not a part of the normal aging process. It needn't occur, but when it does, it can trigger severe inflammation, resulting in devastating effects. The most dangerous form of beta amyloid appears to be groups of clumps or pieces, rather than the plaque itself.

PLAQUE-OUT works like a kind of mental floss to help minimize, prevent or even clear-out the buildup of amyloid plaque, those abnormal clusters of sticky-like proteins that can build up between nerve cells in the brain. In the process, memory loss, brain fog and confusion can be reduced.

PLAQUE-OUT helps to keep your brain, which is the most powerful organ in your body, firing on all cylinders. Since your brain controls many functions in addition to memory, thinking and problem solving, anything that helps your brain function more effectively is of significant value to your entire body.

PLAQUE-OUT crosses the blood/brain barrier, and works best when taken with alcoholic beverages. Its effect is enhanced when taken together with **X-PUNGE™** (see reverse side), as part of a healthy dietary regimen, which should ideally include omega 3 fatty acids. The use of music and meditation is recommended as well.

PLAQUE-OUT can be safely taken with other nootropic nutraceuticals and cognitive enhancers, such as: vinpocetine, bacopa monnieri, huperzine, ginkgo biloba, lions mane mushroom, citicoline, etc. All ingredients in **PLAQUE-OUT** are GMO, soy and gluten free. Some are even zone refined, for the highest possible purity obtainable.
